The following listing of claims will replace all prior versions, and listing of

claims in the application:

**LISTING OF CLAIMS:** 

Claim 1 (Currently amended) An MP3 personal storage device with adapted

for wireless communication with a blue tooth equipped cellular phone and a blue

tooth equipped data processing device and having an incoming call income call

displaying function, said MP3 personal storage device having which has an

earphone and a microphone and comprises:

a memory control module coupled to at least one memory for storing

a digital data;

a signal processing module coupled to said earphone, said

microphone and said memory control module for processing said digital signal,

said signal processing module including (a) a voice transmission and

encoder/decoder unit used to encode/decode a voice and convert data between a

digital format and an analog format, and (b) an MP3 decoder used to decode an

MP3 digital file to a voice signal for output to said earphone;

a blue tooth module coupled to said memory control module through

a first output and said signal processing module through a second output for (a)

receiving a remote data signal from the cellular phone and replying with a

modulation signal, the remote data signal being coupled to said signal processing

module through said second output, and (b) receiving MP3 encoded data from the

data processing device and coupling said received MP3 encoded data to said

memory control module through said first output; and

a monitor coupled to said memory control signal processing module

for displaying a digital data transmitted from said signal processing module

broadcast information produced after processing an MP3 digital file by said signal

processing module and incoming call information responsive to receiving said

remote data signal from the cellular phone.

Claim 2 (Original) The MP3 personal storage device as in claim 1, wherein

said memory control module is a card reader, said memory is a memory card

detachably inserted to said card reader for expanding content of said memory card.

Claim 3 (Currently amended) The MP3 personal storage device as in claim

1, wherein said memory card is a flash memory card.

Claims 4 - 10 (Cancelled).

Reply to Office Action dated 27 January 2006

Claim 11 (New) The MP3 personal storage device as in claim 1, wherein

said remote data signal includes first voice signals coupled to said earphone

through said signal processing module, and said modulation signal includes

second voice signals coupled from said microphone through said signal processing

module.

Claim 12 (New) The MP3 personal storage device as in claim 1, wherein

said signal processing module interrupts coupling of said voice signal derived

from said MP3 digital file to said earphone and outputs voice signals included in

said remote data signal to said earphone responsive to receipt of said remote data

signal from the cellular phone, said signal processing module again outputting said

voice signal derived from said MP3 digital file to said earphone responsive to

termination of receipt of said remote data signal from the cellular phone.
